

Latchlock with Master Key System

Introducing a new generation of latchlock! This innovative latchlock comes complete with a master key for emergency access. Use it to operate the handle and gain entry without cutting or damaging the latch.

Originally developed for school lockers, this patented latchlock combines padlock security with a safe, child-friendly design. Rounded edges and recessed lock cavity prevent injuries while allowing key operation even with the padlock fitted.

Its compact build and 1-, 2- or 3-point cam options suit not only educational settings but also public and government buildings, leisure centres and industrial environments.

Alongside lockers and furniture, typical applications include utility cabinets and enclosures, telecom boxes and service panels.

This latchlock ensures padlock-level protection with flexible key access.

Telecom boxes and technical panels

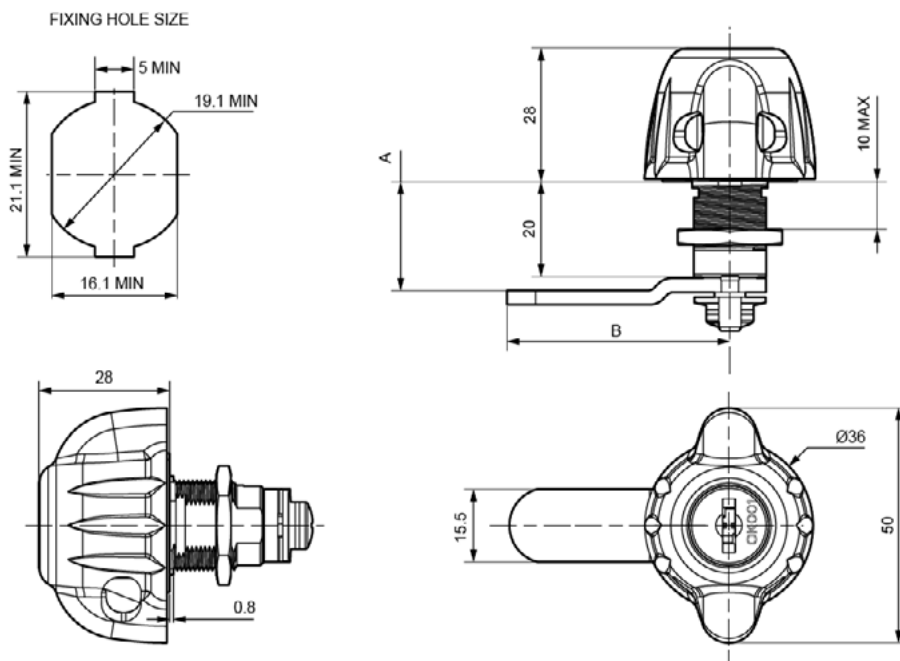

Utility cabinets and enclosures

Industrial access doors with padlock security

Latchlock with Master Key System

Locking systems for industry
