

# Zodiac Workspace:

Opening doors to a new way of working

Opening possibilities

# Brilliantly designed, accessibly priced

Zodiac gives you state-of-the-art digital storage at an exceptional price point. It includes all the core functions that users and storage providers expect – along with a far faster return on investment.

**Zodiac is, without doubt, one of the most cost-effective smart locker systems on the market.**

Make every space work harder

# Go on - make something happen

Looking to make hybrid working more accessible? We've got you. Want to assign storage remotely? No problem.

**If you're out to shake things up a bit – Zodiac Workplace is the ideal storage system for any place that refuses to stand still.**

## Unique branding and customisation

Tailor the Zodiac terminal to match your branding and colour scheme. We can do this on an individual system-by-system basis, so your storage complements its surroundings beautifully.

## A streamlined user experience

Lockers built around the Zodiac system can be accessed in seconds, simply using an RFID card or PIN code. A clear, easy-to-use touchscreen menu makes every step quick and intuitive.

Storage can be assigned on a personal, registered user, or guest basis. Zodiac provides all the options you need to bring your storage ideas to life. It even supports multiple languages, making it perfect for international workforces and visitors.

## Sophisticated management tools

System settings are controlled through an administrator menu on the terminal. This provides instant access to permission-managed functions. Usage logs are also available for audit purposes, in case of investigation requirements.

## Zodiac system components

# Smarter locking tech - easier installation

Designed with specifiers and installers in mind, Zodiac Workspace is refreshingly easy to install. No need for bulky electrical enclosures and complex on-site wiring. The Zodiac system requires the integration of just three elements into each locker bank:

### Touchscreen Control

The Zodiac system includes a slimline 10.1-inch, LCD touchscreen. Designed for flush mounting on the locker bank, this gloss-black display looks as good as it performs. An energy-efficient LED backlight uses less power and generates less heat – ideal for indoor spaces like lobbies and workspaces.

Perfect for public use, this touchscreen offers a smooth, intuitive experience for supervised indoor settings.

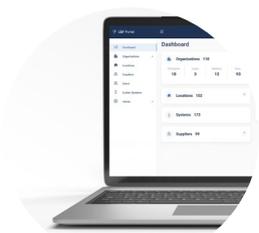

### Electronic Latches

Zodiac electronic latches include a range of innovative features. Built to handle everyday wear and tear, they make life easier for both users and installers.

### Distribution Boards

Zodiac distribution boards connect the touchscreen to the electronic latches. This makes installation, scaling and maintenance so quick and easy. Whether you're setting up small, or installing a full wall of lockers, Zodiac Workplace grows with you – no fuss, no rewiring.

### Web Portal

Administrators can assign lockers, track usage and control access across all operating modes in real time and from any location.

What makes Zodiac unique?

# Not just smart - smarter all round

## Security and convenience in one

Zodiac gives users simple and safe access using an RFID card or a PIN code – no keys, no fuss. Each locker will only open for that allocated user – ensuring real security throughout the day.

## Designed for agile workspaces

Whether you're creating the perfect hybrid workspace, or providing employees with more agile storage solutions, Zodiac makes it all possible. And it's because it's so flexible, Zodiac is always ready to adapt to your team's needs

## Flexible storage modes

Choose between private, registered user or guest storage access. Zodiac easily adapts to how your space is used – from day to day, month to month or year to year.

## Cloud connected, real-time control

Manage your locker system remotely from anywhere in the world. Cloud connection shows you what's happening in real time – monitor usage capacity and instantly increase locker availability by detecting 'locker blocking'.

## Actionable insights & analytics

Zodiac helps you make data-driven decisions. See past usage patterns, identify high demand zones – then optimise your locker allocation. Perfect for an evolving workspace. Clear, easy-to-read dashboards deliver everything you need to know in both graphical and tabular formats.

## Technical support, responsive and available

As your trusted partner, we deliver more than just technical support – we provide peace of mind. Our highly responsive team is always ready to act, ensuring your queries are resolved swiftly and your systems remain fully operational. We don't believe in one-size-fits-all; our support is tailored to your exact requirements, whether you need assistance during standard hours or round-the-clock coverage. With us by your side, you can be confident that downtime is minimised, performance is maximised, and your business keeps moving forward without interruption.

## Flexible operating modes

# Storage that adapts to you

Zodiac gives you the power to tailor locker use to your environment – whether you're managing assigned desks, hybrid teams or high-traffic guest areas.

### Private mode

Assign lockers to individual users for exclusive, ongoing access. Ideal for permanent staff or teams with fixed workstations. Users simply tap their RFID card or enter their PIN – no keys, no confusion.

### Registered public mode

Perfect for hybrid teams or shared offices. This mode allows pre-approved users to access any available locker. Once registered, users can access lockers instantly using their RFID card or PIN – no admin needed.

### Guest mode

For open environments, like co-working spaces or visitor zones. Guest Mode makes lockers freely available to anyone. User just scan their RFID card or enter their PIN before selecting an available locker.

### Scheduled guest mode

Schedule all lockers to be reset or opened at certain times of the day to maximise usage.

### Zodiac web portal

Administrators can assign lockers, track usage and control access across all operating modes in real time and from any location.

# Try Zodiac for real

The best way to see how easy it is to use Zodiac Workspace is to try it in person. Book your demonstration and see why Workspace storage will never be the same again.
